CENTRAL UNIVERSITY OF PUNJAB

Master of Arts in Psychology

Batch - 2024

Department of Psychology

Graduate Attributes

After the completion of the Master's degree program in the University, the learners would be equipped with the necessary professional skills in psychological assessments, diagnosis and management of different psychological issues. They could exhibit critical analysis of contemporary events / happenings to deal with them with a novel solution. Learners could apply the suitable digital technology to assist in their psychological practice and at the same time be aware of the ethical issues related to research misconduct and intellectual property rights.

Course Structure

Semester-I

Course	Course Title	Course Type	Credit Ho			urs

Examination pattern

Core, Discipline Elective, Compulsory Foundation, Value Added and Interdisciplinary		Discipline Enrichment Course		Entrepreneurship Course		
Courses						
	Mar ks	Evaluation	Mark s	Evaluation	Marks	Evaluation
Internal Assessme nt	25	Surprise Tests, homework assignments, case analysis/term paper		Objective & Subjective		Objective & Subjective
Mid- semester test (MST)	25	Subjective	50	Objective	25	Objective
End- semester test (EST)	50	Subjective (70%) Objective (30%)	50	Objective	25	Subjective

Practical Courses		
	Marks	Evaluation

Internal Assessment	25	Class/Laboratory performance (20 Marks), attendance (5 Marks)
End-semester test (EST)	75	Design and performance [40 Marks], Viva voce [15 Marks], Practical file [20 Marks]

	rtation P	-	Dissertation			
(Th	ird Seme	ester)	(Fourth Semester)			
	Marks	Evaluation		Marks	Evaluation	
Supervisor	50	Dissertation proposal and presentation	Supervisor	50	Continuous assessment (regularity in work, mid-term evaluation) dissertation report, presentation, final viva-voce	
HoD and senior-most faculty of the department	50	Dissertation proposal and presentation	External expert, HoD and senior- most faculty of the department	50	Dissertation report (30), presentation (10), final viva-voce (10)	

Internship (Third Semester)			
	Marks	Evaluation	
Supervisor	50	Internship report presentation	
External co-supervisor, HoD and senior-most faculty of the department	50	Internship report presentation	

Multiple Entry and Exit: Any student of the MA programme in Psychology who wishes to leave the course after successful completion of MA first year, may be given a 'Post Graduate Diploma in Psychology' as per the University guidelines, provided the candidate successfully completes additional MOOCs of 04 credits as decided by the department during /after completion of MA First year (but not later than one year after the completion of the first year of MA Programme) / conducting a 'Mini Research Project' in the proposed specialized area / getting Industrial training or Internship 4 weeks in the relevant domain.

SEMESTER - I

Course Code: PSY.512

L	Т	P	Credits
4	0	0	4

Course Title: Systems and Theories of Psychology Total Hours: 60

Course Learning Outcomes:

After the completion of this course, the students should be able to

• CLO1: Define the subject matter of psychology.

• CLO2: Outline the application of psychology in various spheres of life.

• CLO3: Comprehend the contribution that different systems and theories

have made to the discipline of psychology.

Units/ Hours	Contents	Mapping with Course Learning Outcome
UNIT I/14 Hours	Systems in Psychology: Meaning and types, Evaluation of systems of Psychology, Some basic issues in Psychology. Eastern perspectives of Psychology, Indigenous Psychology, Paradigms of Western Psychology: Positivism, Post-Positivism, Social Constructionism, Existential Phenomenology, Critical Theory, Cooperative inquiry. Student Activities: Reading the life stories of major personalities associated with these paradigms	CLO1, CLO2
UNIT II/16 Hours	Structuralism: Contribution and comparison of William Wundt and Titchener, criticism of structuralism; Psychophysics; Functionalism: Contribution of William James, criticism of functionalism. Student Activities: Draw a comparison of the contribution that the schools mentioned in this unit have made in the development of Psychology.	CLO3
UNIT III/15 Hours	Gestalt Psychology: Max Wertheimer, Wolfgang Kohler, Kurt Koffka; Psycho analysis: Contribution and criticism of Sigmund Freud Student Activities: Identification of situations where these theories can be applied.	CLO3

UNIT	Behaviourism: Brief introduction to the contribution of John B. CLO3		
IV/ 15	Watson;		
Hours	Humanistic theories: Abraham Maslow's theory of self-actualization and Rogers's self-theory; Existential theories: Victor Frankl, Rollo May.		
	Student Activities: Identification of situations where these theories can be applied.		

- 1) Lecture
- 2) Demonstration
- 3) Lecture cum demonstration
- 4) Group discussion
- 5) Focused group discussion
- 6) Cooperative learning
- 7) Brainstorming
- 8) Collaborative learning
- 9) Problem-solving
- 10) Projector Method (tool for the transaction)

Course Title: Social Psychology Total Hours:

60

Course Learning Outcomes:

After the completion of this course, the students should be able to

- CLO1: Comprehend the psychological interaction between individual and society,
- CLO2: Comprehend the influence of societal factors on individual, and
- CLO3: Apply social psychology at the individual as well as societal level.

Units/ Hours	Contents	Mapping with Course Learning Outcome
Unit I /15 Hours	Social psychology: Nature, Scope and Methods; Socialization: Agencies of socialization; Social Cognition: Heuristics: Representativeness, Availability, Anchoring and Adjustment, Status Quo Heuristic. Schemas. Impact of schemas on social cognition, Priming, Schema persistence. Potential sources of error in social cognition; Social Perception: Role of non-verbal communication in social perception. Attribution and its theories.	CLO1
	Student Activities: List a few real-life examples of non-verbal communication in social perception. Discuss the role of social psychologists in global pandemics.	

Unit II /16 Hours	Self: Managing the self in different social contexts. Personal versus social identity. Self-esteem: Attitudes toward ourselves; Social influence: conformity, compliance, and obedience to authority; Attitude: nature, the effect of attitudes on behaviour, attitude formation, attitude maintenance. Persuasion and its resistance. Cognitive Dissonance and attitude change. Student Activities: Do a social experiment on attitude change towards any social issue in your university.	CLO2
Unit III /15 Hours	Stereotyping: Nature and Origins of Stereotyping. Formation and use of stereotypes; Prejudice: Nature and different perspectives on understanding prejudice; Discrimination: Nature, techniques for countering its effects; Aggression: perspectives on aggression, causes on human aggression,	CLO2
	bullying, techniques for preventing and controlling aggression; Prosocial behaviour: Different perspectives on prosocial behaviour, bystanders effect, factors affecting prosocial behaviour. Student Activities: Do a social experiment showing the role of bystanders in an accident/emergency situation. Share the techniques of preventing/controlling aggression through lectures/demonstrations/role-playing/etc. in your university.	
Unit IV /16 Hours	Groups: social facilitation, social loafing, cooperation and group conflicts. Leadership: Theories and styles; Application of social psychology: social psychology and health, caregiving, caregiver stress, social psychology and environment, social psychology and Law; Personal space, crowding, and territoriality. Student Activities: Do role-playing/play in your university demonstrating how to resolve group conflicts. Demonstrate the profile depicting the style of leadership of some person from history.	CLO3

- 1) Lecture
- 2) Demonstration
- 3) Lecture cum demonstration
- 4) Group discussion
- 5) Focused group discussion
- 6) Cooperative learning
- 7) Brainstorming
- 8) Collaborative learning
- 9) Problem-solving
- 10) PROJECTOR METHOD (tool for the transaction)

Suggested Readings:

Total Hours: 60

Course Title: Cognitive Psychology

Course Learning Outcomes:

After the completion of this course, the learners will be able to

- CLO1: Comprehend the lower to higher cognitive processes.
- CLO2: Identify and discriminate between different cognitive processes influencing human behavior.
- CLO3: Analyze and critically reflect on current theories and research with respect to different cognitive processes.
- CLO4: Reflect on how cognitive psychology can enhance understanding of how people evaluate, make decisions, solve problems, and act.

II.a.ita /II		Mapping with
Units/H ours	Contents	Course Learning Outcome

		1
UNIT I 15 Hours	Cognitive Psychology: History, Methods. Paradigms of Cognitive Psychology: Information processing approach, Associationistic approach, Evolutionary approach. Perceptual processes: Gestalt Approaches to Perception; Bottom-Up Processes: Template Matching, Featural Analysis, Prototype Matching; Top-Down Processes: Perceptual Learning, Change Blindness, The Word Superiority Effect; Direct Perception; Disruptions of Perception: Visual Agnosia Student Activities: Identification of examples of Bottom up and top-down processes from your everyday life experiences. Brief presentations on experimental procedures (published in research papers) for the scientific investigation of the topics of this unit.	CLO1
UNIT II 15 Hours	Learning Theories: Functionalistic Theories: Thorndike, Skinner, Hull; Associationistic Theories: Pavlov, Guthrie; Cognitive Theories: Piaget, Tolman, Bandura Intelligence: Meaning and definitions. Theories- Binet, Spearman, Thurston, Cattell, Jensen, Gardner; Use of factor analysis Creativity: Meaning and theories. Decision Making: Algorithms and Heuristics: Representative, Availability, Anchoring and Adjustment. Illusory correlation, over confidence in decisions, Framing effect and Hindsight bias. Student Activities:Identification of situations where these Learning theories can be applied. Draw a comparison between the theories of creativity.	CLO2, CLO3, CLO4
UNIT III 15 Hours	Memory Processes: Sensory Memory: Iconic and Echoic. Short Term Memory and its Models: Modal Model of Memory, Structural and Levels of processing approach. Long Term Memory; Encoding specificity and Retrieval; Declarative and Non-declarative Models; Autobiographical and flashbulb memories. Baddley's working Memory Model. Semantic Memory: Nature, background and structure. Models: feature comparison model, Network Model (Collins and Loftus Network Model and McClelland's PDP approach). Techniques of Memory improvement. Problem Solving: Problems and types: Well defined and ill-defined problems. Approaches to problem solving: Means end Heuristics, Hill climbing, Analogy Approach, Factors influencing problem solving Student Activities: Critically review the latest research papers published on the topics. Out of your life experiences identify and discuss the situations that foster and block problem solving abilities.	CLO2 CLO3.

UNIT IV 15 Hours	Attentional Processes: Selective Attention and Divided Attention; Theories of attention: Filter theory, Attenuation theory, Late selection theory, and Resource Allocation. Language Comprehension: Structure of language: Phonology, Syntax, Semantics and Pragmatics; Language and Cognition: Modularity hypothesis, Whorfian hypothesis. Neuropsychological evidence of language. Speech perception: Approaches to speech perception (General Mechanism Approach and Special Mechanism Approach). Student Activities: Draw a comparison among the theories of attention and discuss the experimental support for them. Brief presentations on experimental procedures (published in research papers) for the scientific investigation of the topics of this unit.	,

Course Title: Research Methodology and Statistics - I

Total Hours:

60

Course Learning Outcomes:

After the completion of this course, the learners will be able to

- CLO1: Demonstrate the knowledge of research approaches in psychology.
- CLO2: Differentiate various data collection and sampling methods employed in quantitative research.
- CLO3: Design an experimental study in psychology
- CLO4: Explain methods employed in summarizing and organizing the data.

Units/I	Hours	Contents	Mapping with Course Learning Outcome
UNIT Hours	I /15	Meaning, nature and purpose of Research; Research approaches in Psychology: Quantitative, qualitative; Process of quantitative research: Formulation of Research problem; Reviewing the Literature, Hypothesis and types; Measurement: definition, scales of measurement; Variables and types. Student activities: Identification of the databases that are helpful for review of literature, Formulating substantive and statistical hypotheses based on research gaps, Finding out examples for various types of variables and identifying their scales of measurement.	CLO1
UNIT Hours	II/15	Population and sample: Basic assumptions; Sampling distribution; Sampling techniques: probability and non-probability sampling; Methods of data collection: observational methods, surveys, questionnaires, interviewing methods, case study methods, and psychometric tests; Ethics in psychological research. Student activities: Identification of research articles that employed various sampling techniques and methods of data collection	CLO2

UNIT III/15 Hours	Research Design; Experimental research designs: between-subject vs. within-subjects design, completely randomized design, randomized block design, Latin square design, factorial designs; Quasi-experimental designs, Single-subject designs	CLO3
	Student Activities: Identification of research articles that used these research designs.	
UNIT IV/15 Hours	Statistics: definition, purpose, methods; Descriptive statistics: Measures of Central Tendency and dispersion, Introduction to Probability, Normal probability curves and its applications, Deviations from normality, z-scores, Distribution of sample means. Student Activities: Exploring the descriptive statistics	CLO4
	for hypothetical data in Excel or in SPSS and scientifically describing the findings.	

- 1. Lecture
- 2. Demonstration
- 3. Project method
- 4. Problem-solving
- 5. Case-based study

Course Title: Practicum-I: Psychological Experiments Total Hours: 120

Course Learning Outcomes:

After the completion of this course, the learners will be able to

- CLO1: Understand the processes and steps involved in conducting the psychological experiments both in and outside the laboratory.
- CLO2: Design and undertake the psychological experiments independently.
- CLO3: Prepare the scientific report of the experiments/studies they undertake.

Students would be familiarized with all the listed experiments and could perform any 8 experiments from the list.

SEMESTER - II

Course Code: PSY.585

L	Т	P	Credits
4	0	0	4

Course Title: Biopsychology Total Hours: 60

Course Learning Outcomes:

After the completion of this course, the learners will be able to

- CLO1: Comprehend the biological basis of behavior.
- CLO2: Develop an understanding of research methods of biopsychology
- CLO3: Analyze the inter-related effects of psychology and biology on an individual.
- CLO4: Appraise the structure and functions of biological processes influencing behavior.

Units/ Hours	Contents	Mapping with Course Learning Outcomes
UNIT I 15 Hours	Biopsychology: Nature, History and Scope. Research methods of Biopsychology: Ablation, Stimulation, Neuropsychological Testing. Neurons: Structure, Types, Functions Functional neuroatonomy, Communication within neurons and communication between neurons. Neuroplasticity, factors affecting neuroplasticity. Student Activities: Students will draw a neuron and label its major structures and their corresponding functions	CLO1. CLO2. CLO3. CLO4.
UNIT II 15 Hours	Nervous System: Classification (Central Nervous System and Peripheral Nervous System) Brain: Functions of Forebrain-medula, pons, and cerebellum, Midbrain and Hindbrain, thalamus, hypothalamus, limbic system and cerebrum. Spinal Cord: Functions. Student Activities: Students will draw the major parts of the brain and label their corresponding functions	CLO1. CLO3. CLO4.

UNIT III 15 Hours	Endocrine Glands: Nature, Functions of Thyroid gland, Parathyroid gland, Adrenal gland, Pancreas, Gonads, Pituitary Glands, Pineal Gland. Student Activities: Spread awareness (for about 1 week) about the relation of iodine and thyroid gland functioning, and the effect of iodine deficiency in pregnant women in the nearby rural areas.	
UNIT IV 15 Hours	Physiological basis: vision, hearing, touch, taste and smell. Physiological basis: Hunger, Thirst, Sleep and Sex. Physiological basis: Learning, Memory, Emotion and Aggression. Student Activities: Study the sleep cycles of a subject in laboratory using biofeedback apparatus.	CLO1.

Course Title: Theories of Personality Total Hours: 60

Course Learning Outcomes:

After the completion of this course, the students should be able to

- CLO1: Comprehend human personality from biological, psychological and socio-cultural aspects.
- CLO2: Decipher intensively various approaches towards personality.
- CLO3: Understand the contemporary theories of personality.

Units/ Hours	Contents	Mapping with Course Learning Outcome		
UNIT I/ 16 Hours	,			
UNIT II/ 15 Hours	Humanistic and existential approach: Abraham Maslow, Carl Rogers, Rollo May, Indian perspectives of self. Cognitive Approach: George Kelly;Field Theory: Kurt Lewin, Egon Brunswik Student activities: Compare the viewpoints of different humanistic psychologists and relate their perspectives to some examples from real-life situations. Discuss these with your classmates during group discussions.	CLO1 CLO2		

UNIT III/ 15 Hours	Social Learning Approach: Miller and Dollard, Albert Bandura, Julian Rotter; Type Approach: Wiliam Sheldon, Ernst Kretschmer, Mark Friedman and John Rosenman; Trait Approach: Gordon Allport, Hans Eysenck, Raymond Catell, McCrae and Costa Five Factor Theory.	CLO2 CLO3			
	Student activities: Create a hypothetical situation where a child of 3 years learns some new behaviour. Try to explain the child's learning from the perspective of different social-learning theorists.				
UNIT IV/ 14 Hours	Contemporary theories of personality: Sensation Seeking theory: Marvin Zuckerman; Learned Helplessness: Martin E. Seligman; Brief introduction to the Feminist perspective: Patricia Hill Collins, Nancy Chodorow, R.W. Connell Student activities: Relate the perspective of various contemporary theorists to real life situations.	CLO3

Course Title: Research Methodology and Statistics - II

Course Learning Outcomes:

After the completion of this course, the students will be able to

- CLO1: Differentiate between the application of parametric and non-parametric tests.
- CLO2: Analyze the data using correlation, regression and factor analysis methods.
- CLO3: Demonstrate skills in designing qualitative research

• CLO4: Write the research report in APA format

Units/Hou	Contents	Mapping		
rs		with		
		Course		
		Learning		
		Outcome		
UNIT I /15	Inferential statistics: Types; Introduction to hypothesis	CLO1		
Hours	testing, level of significance, type-I and type-II errors,			
	Parametric tests of significance: t-tests, ANOVA, MANOVA, ANCOVA			
	Student Activities: Identification of research articles that			
	used these parametric tests, Performing these parametric			
	tests for a hypothetical data in SPSS and describing the			
	findings in a scientific manner.			
UNIT	Non-parametric tests of significance: Chi-square, Mann	CLO1		
II/ 14	Whitney U test, Wilcoxon Signed Rank test, Kruskall			
Hours	Wallis test, Friedman test			
	Student Activities: Identification of research articles that			
	used these non-parametric tests, performing these tests			
	for hypothetical data in SPSS and describing the findings			
TINITA	in a scientific manner.	OI OO

Course Title: Positive Psychology Total Hours: 45 hours

Course Learning Outcomes:

After the completion of this course, the students would be able to

• CLO1: Describe the movement of positive psychology

• CLO2: Examine various positive strengths and virtues

• CLO3: Explain various positive emotions

• CLO4: Describe positive personal traits

Units/ Hours	Contents	Mapping with Course Learning Outcome
UNIT I/12 Hours	Positive PsychologyNature and history: western and eastern perspectives on positive psychology, Scope of positive psychology Student Activities: Tracing the history of positive psychology	CLO1
UNIT II/12 Hours	Positive emotional states: Happiness, Subjective wellbeing, emotional intelligence Positive cognitive states: Self-efficacy, Optimism, Hope, Flow, and Mindfulness Student Activities: Self-evaluation of positive emotional and cognitive states through established scales.	CLO2
UNIT III/11 Hours	Positive relationships: Love, Compassion, Empathy, Altruism, Gratitude, Forgiveness Student Activities: Performing simple acts of altruism and gratitude and sharing the experience in the group. Identify ways to forgive a person/an act.	CLO3
UNIT IV/10 Hours	Positive personal traits, positive coping strategies, resilience and post-traumatic growth, positive psychology interventions, Applications of positive psychology: parent & child relationship, family settings, sports settings, employee satisfaction, education, clinical settings	CLO4

Student Activities: Identifying real-life stories of resilience and post-traumatic growth.

Total Hours: 45

Course Title: Behavior Modification

Course Learning Outcomes:

After the completion of this course, the learners will be able to

- CLO1: Comprehend the elementary elements of behavior modification
- CLO2: Outline different techniques for measuring behavior
- CLO3: Apply different techniques for establishing new behaviors in people with intellectual disabilities
- CLO3: Make use of different procedures for decreasing problem behaviors in people with intellectual disabilities

Units/Hou rs	Contents	Mapping with Course Learning Outcome
UNIT I / 12 Hours	Defining Behaviour Modification; Characteristics of Behaviour Modification; Observing and Recording Behavior: Direct and indirect assessment; defining the target behavior; the logistics of recording; When and Where to Record; The characteristics of the observer; choosing a recording method; continuous recording; product recording; interval recording; time sample recording; choosing a recording instrument. Student activities: Observe and record a few examples from real-life where Behaviour modification is required	CLO1, CLO2
UNIT II / 12 Hours	Measurement of behavior change: Graphing behavioral data; graphing different dimensions of behavior. Research designs: Reinforcements: Defining reinforcement, types,, conditioned and unconditioned reinforcers. Factors that influence the effectiveness of reinforcement: Punishments: Definition, types, side effects, factors that influencing the effectiveness of punishments. Student activities: Present and role-play the examples of reinforcement commonly used in the society by parents during parenting.	CLO2, CLO3
UNIT III / 11 Hours	Procedures to establish new behavior: Shaping, defining shaping, applications of shaping, shaping procedure, shaping of problem behaviors.	CLO3.

	Prompting and transfer of stimulus control: defining prompting, fading, types of prompts, prompt fading, prompt delay, stimulus fading, procedure of prompting and transfer of stimulus control. Chaining: Defining chaining, forward chaining, backward chaining. Student activities: Role-play some instances of shaping of newer behaviours and fading of older behaviours.	
UNIT IV / 10 Hours	Procedures to Increase Desirable Behavior and Decrease Undesirable Behavior: Differential Reinforcement; Differential Reinforcement Of Alternative Behavior, Differential Negative Reinforcement of Alternative Behaviors; Differential Reinforcement of other Behavior; Differential Reinforcement of Low Rates of Responding; Antecedent Control Procedures: Defining Antecedent Control Procedures; applications Student activities: Go through various historical experiments on differential reinforcement and present those during group discussions.	CLO3, CLO4

- 1) Lecture
- 2) Demonstration
- 3) Lecture cum demonstration
- 4) Group discussion
- 5) Focused group discussion

Course Title: Rehabilitation Psychology Total Hours: 45

Course Learning Outcomes:

After the completion of this course, the students would be able to

- CLO1: Understand the field of rehabilitation psychology
- CLO2: Examine various clinical and disability conditions that needs rehabilitation
- CLO3: Comprehend various medical based and psychosocial interventions
- CLO4: Examine the acts, policies and schemes for persons with disabilities

Units/ Hours	Contents	Mapping with Course Learning Outcome
UNIT I/10 Hours	Definition; historical overview; goals; functions; scope; models in rehabilitation psychology: biopsychosocial model (Engel, 1980); World Health Organization's International Classification of Functioning, Disability, and Health (WHO, 2001); Applications of psychological models. Student Activities: Make charts depicting the major chronological events in the history of rehabilitation psychology.	CLO1
UNIT II/11 Hours	Clinical conditions (stroke, traumatic brain injury); Disabilities mentioned under Rights of Person with Disability Act, 2016; Post traumatic stress among persons with disabilities; Adaptation to chronic illness and disability; Impact on family or caregivers; Societal attitudes towards persons with disabilities and strategies for attitude change; Impact of pandemic on persons with disabilities. Student Activities: Making a poster/Conducting a role play to change the societal attitude towards disability	CLO2

UNIT III/12 Hours	Brief introduction to Medical based interventions: - early detection & early intervention, therapeutics such as physiotherapy, occupational therapy & speech therapy, surgical interventions (disorder specific), pharmacotherapy, lifestyle changes such as diet & exercise, assistive technology; Brief introduction to Psychosocial interventions: counselling	CLO3
	, psychoeducation, parent training, psychotherapies: supportive therapy, behaviour therapy, cognitive behaviour therapy, stress management, Indigenious practices-Yoga and Meditation, group therapy, family therapy, neuropsychological interventions, respite care, parent associations; Educational rehabilitation; Vocational rehabilitation; Community based rehabilitation.	
	Student Activities: Visiting a rehabilitation center where the above services are offered/ Having a conversation with rehabilitation professionals about the interventions	
UNIT IV/12 Hours	Acts for persons with disabilities: The mental health act 1987; Rehabilitation council of India act, 1992; Persons with disabilities (equal opportunities, protection of rights and full participation) act, 1995; National trust for welfare of persons with autism, cerebral palsy, mental retardation and multiple disabilities act. 1999; Rights of person with disability act, 2016; United Nation Convention on the Rights of Persons with Disability; Important schemes and benefits for persons with disabilities and their families.	CLO4
	Student Activities: Improving the awareness about the schemes and benefits among persons with disabilities and their families through posters

Course Title: Psychology Entrepreneurship Total Hours: 30

Course Learning Outcomes:

This course explores the intersection of psychology and entrepreneurship, focusing on the skills, knowledge, and mindset needed to start and grow a successful business in the field of psychology. Students will learn how to apply psychological principles to identify entrepreneurial opportunities, develop innovative solutions, and navigate the challenges of starting and managing a psychology-based business.

After the completion of this course, the learners will be able to

- CLO1: Understand the fundamentals of entrepreneurship and its relevance to the field of psychology and Identify entrepreneurial opportunities within the psychology domain.
- CLO2: Develop a comprehensive business plan for a psychology-based venture.
- CLO3: Acquire knowledge of marketing, financial management, and legal aspects of entrepreneurship in psychology.
- CLO4: Develop skills in networking, collaboration, and strategic partnerships

Units/H ours	Contents	Mapping with Course Learning Outcome
Unit I /7 Hours	Entrepreneurship and its importance- why do people become- successful entrepreneurs' characteristics- common myths about entrepreneurs- changing demographics of entrepreneurs- entrepreneurship process- Developing skills Student activities: Make a profile showing the characteristics of a renowned entrepreneur.	CLO1
Unit II /8 Hours	The difference between opportunities and ideas- ways of identifying opportunities- personal characteristics-techniques of generating ideasDeveloping a Business Plan in Psychology-Elements of a comprehensive business plan Student activities: Imagine a small start-up. Write the steps that you will follow to bring that into function.	CLO2, CLO3

Unit III /8 Hours	Creating a brand identity for psychology based businesses-Marketing strategies and communication channels for reaching the target audience-Developing a digital presence and utilizing social media platforms-Financial Management and Legal Considerations-Financial planning, budgeting, and resource allocation-Understanding legal aspects and regulations related to psychology entrepreneurship Student activities: Make a small report discussing the real life incident of the emergence of a small business into a big business empire.	CLO2, CLO3
Unit IV /7 Hours	Building professional networks in the psychology and entrepreneurial Communities-Collaboration strategies and leveraging partnerships for Growth-Mentorship and support networks -Ethical Considerations in Entrepreneurship within Psychology-Maintaining client confidentiality and privacy in Entrepreneurship-Professional standards Student activities: Discuss the profile of some renowned manager whose creativity has set a common business apart from the rest.	CLO4

Course Title: Dissertation Part 1 Total Hours: 120

Course Learning Outcomes:

Students will be able to

- CLO1: Apply the concepts of research methodology learned in the previous semesters
- CLO2: Develop critical thinking
- CLO3: Formulate a researchable problem in an area of psychology
- CLO4: Analyze the existing literature and identify the gaps
- CLO5: Formulate appropriate methodology for conducting the study

Contents	Mapping with Course Learning Outcome
With the orientation about research methodology in the second and third semesters, students will take up individual or group dissertations on the topics related to any field of Psychology.	CLO1, CLO2, CLO3, CLO3, CLO4, CLO5
Students will identify and develop a research topic. They will finalize the topic in consultation with the supervisor. They carry out the literature search in the chosen research area to identify the research gaps. They need to formulate the objectives and hypotheses for the study. They need to design the study with appropriate methodology. The synopsis of the research topic would be presented before the faculty members for further feedback and evaluation.

Course Title: Educational Psychology Total Hours: 45

Course Learning Outcomes:

After the completion of this course, the students will be able to

- CLO1: Critically evaluate the applications of educational psychology
- CLO2: Design a positive environment for learning
- CLO3: Demonstrate skills in managing problem behaviors in classroom settings
- CLO4: Evaluate the educational issues involved with children with special needs

Units/Hours	Contents	Mapping with Course Learning Outcome
UNIT I/12 Hours	Introduction to educational psychology, Historical background, Effective teaching skills, cognitive and language development in the context of education: Piaget's and Vygotsky's theories. Student activities: Observation of young children for various aspects of these theories.	CLO1
UNIT II/12 Hours	Designing the physical environment of the classroom, creating a positive environment for learning, dealing with problem behaviors. Techniques and methods. Student activities: Make a detailed plan to improve the physical environment of the classroom/Visit a school and identify the problem behaviours among the children.	CLO2
UNIT III/10 Hours	Vocational Counseling and Guidance; Indiscipline, Teacher-Student Relationship and Classroom management, Teacher effectiveness Student activities: Provide career guidance to at least 2 students of tenth standard.	CLO3

UNIT IV/ 11	Educational issues involved with gifted children and	CLO4
Hours	children with disabilities, speech and language disorders, emotional and behavioral disorders	
	Students activities: Visiting a special school or interacting with rehabilitation professionals and children to understand these issues.	

- 1. Lecture
- 2. Demonstration
- 3. Project method
- 4. Problem solving
- 5. Case based study
- 6. Brainstorming

Course Title: Clinical Psychology Total Hours: 45

Learning Outcomes:

After the completion of this course, the learners will be able to

- CLO1: Comprehend the basis, theories and classifications for clinical psychology.
- CLO2: Demonstrate the knowledge and skills of diagnosing various psychopathological symptoms.
- CLO3: Demonstrate the treatment and management of various psychological disorders.

Units/H ours	Contents	Mapping with Course Learning Outcome
UNIT I/	Clinical psychology: Nature, Classification of mental disorders (ICD, DSM).	CLO1.
12 Hours	Psycho-diagnostics: History taking, Report Writing, Mental State Examination, Differential Diagnosis.	CLO2
	Clinical application: Behaviour Assessment and Neuropsychological Assessment.	
	Student activities: Compare and contrast the latest versions of ICD and DSM.	
UNIT II/	Psychopathologies:	CLO2
11	Anxiety based disorders: Nature, types and management.	
Hours	Personality disorders: Nature, types and management.	CLO3
	Schizophrenia: Nature, types and management.	
	Mood Disorders: Nature, types and management.	
	Student activities: Go through some past case- studies pertaining to disorders listed in this unit, and discuss them during group discussions.	

UNIT	Psychopathologies:	CLO2
III/	Sexual Disorders: Nature, types and management.	
12 Hours	Developmental & Neuropsychological Disorders: Intellectual disability, Specific learning disorder, Autism spectrum disorder, ADHD, Eating disorders.	CLO3
	Student activities: Visit once or twice to some nearby school to spread awareness regarding developmental disorders.	
	Go through some past case- studies pertaining to disorders listed in this unit, and discuss them during group discussions.	
UNIT	Therapeutic Interventions: Psychoanalytic, Behavioural, Cognitive, Humanistic.	CLO3
IV/ 10 Hours	Brief introduction: ECT, Drug therapy, Play therapy, Family Psycho-education.	
	Student activities: Go through some past case- studies pertaining to therapies listed in this unit, and discuss them during group discussions.	

- 1) Lecture
- 2) Demonstration
- 3) Lecture cum demonstration

Course Title: Organizational Behaviour Total Hours: 45

Course Learning Outcomes:

After the completion of this course, the students should be able to

- CLO1: Comprehend the relevant concepts of Organizational Behaviour
- CLO2: Apply the principles of organizational behavior to any organization in order to make it more productive.

Unit/Ho urs	Contents	Mapping with Course Learning Outcome
Unit I / 12 hours	Introduction to organizational behavior; Historical background, scope, importance and current status of organizational behaviour; Fundamental assumptions of organizational behavior; Organisational Development: Introduction, Objective of OD programme, Basic OD Assumptions, OD Interventions. Student Activities: Trace the history of organizational psychology in India. List the important events on a chart for demonstration.	CLO1, CLO2
Unit II/ 12 hours	Theories of organizational behaviour: Fayol's classical theory of organization; Taylor's scientific management theory; Weber's bureaucratic theory of organization; Elton Mayo's human relations theory of organization. Critical analysis of traditional and modern models of organizational behaviour and their implications. Student Activities: Identify the situations where theories of organizational behaviour can be applied in Indian context.	CLO1, CLO2

Unit III/ 10 hours	1 ,	CLO1, CLO2
_	Job satisfaction: Factors determining job satisfaction, Effect of Job satisfaction on performance; Conflict Management: Introduction, Transition of Conflict, Types of Conflict, Conflict Process, Causes of Conflict, Conflict Resolution Model; Dynamics of Communication: Introduction, Objectives of communication, Communication Process, Means of communication, Structure of communication, Types of communication, Communication network, Barriers to effective communication, Overcoming communication barriers Student Activities: Demonstrate the ways to remove barriers in communication to university students through lecture/role-play/ demonstration/etc.	CLO1, CLO2

- 1. Lecture
- 2. Demonstration
- 3. Project method
- 4. Group discussion
- 5. Case based study
- 6. Brain storming
- 7. Role play

Total Hours:

Course Title: Sports Psychology 45

Learning Outcomes:

After the completion of this course, the learners will be able to:

- CLO1: Trace the development of Sports Psychology as an independent field.
- CLO2: Identify factors affecting performance in sports during individual as well as team events.
- CLO3: Comprehend the role of psychological assistance during sports' performance enhancement.

Units/Ho urs	Contents	Mapping with Course Learning Outcome
UNIT I/ 12 Hours	Sports Psychology: Definition, Nature and Scope. History of Sports Psychology in India and abroad; Role of Sports Psychologist; Behavioral Principles and their applications in sports; Motor learning and transfer of learning: Nature, Factors and application in sports; Feedback: Functions of feedback in sports. Students activities: Trace the history of sports psychology in India, and mark the important events on charts for demonstration.	CLO1, CLO2.

UNIT II/ 12 Hours	Personality and Sports Performance, Personality Profiles of Successful Sportspersons; Motivation and Emotions in Sports Performance: Theories and Techniques; Coaching behaviour, Relationship between coach and athlete, Development of mental toughness Leadership in sports: Team Cohesion and Team Building; Elite athletes, Women Athletes and Players with disability.	CLO2
	Student activities: Make personality profiles of at least two famous sportspersons who were successful at the beginning of their career but later could not maintain that spot in sports.	
UNIT III/ 10 Hours	Anxiety, Stress and Burnout; Coping Strategies and Interventions; Goal setting and managing failure; Drug abuse in Sports: Causes and Prevention; Bullying and violence in Sports: Causes and Prevention. Student activities: Trace a few incidents from the	CLO2
	history on violence in sports and discuss them with your classmates during group discussions.	
UNIT IV 11 Hours	Sports Injury and rehabilitation; Managing aging in sports; Psychological Skills Training and Effective Intervention Programs: Imagery Training, Biofeedback, Music and Progressive muscular relaxation therapy. Yoga for sportspersons. Student activities: Meet any retired sportsperson and	CLO3
	know the issues of retired sportspersons from his perspective. Spread awareness about the benefits of yoga for sportspersons in your university

Course Title: Cyberpsychology Total Hours: 45 hours

Course Learning Outcomes:

After the completion of this course, the students would be able to

- CLO1: Assist in fostering healthy human-technology interaction.
- CLO2: Analyze the impact of cyberspace on human physiology and personality.
- CLO3: Understand the consequences of unhealthy cyber practices.
- CLO4: Foster the values and morality in cyberspace.
- CLO5: Understand the application of various therapies of cyberpsychology.

Units/Ho	ours	Contents	Mapping with Course Learning Outcome
UNIT I	,	Introduction to cyberpsychology: Nature, Characteristics of cyberspace, Human-computer interface communication in the virtual world, Social media: Nature, Origin, Types, nature and consequences of acceptable behaviours of social media (profiles, connections, updates, messaging, avatars, selfie culture, use of filters) Student Activities: Tracing the history of cyberpsychology	CLO1
UNIT I	I/ 11	Self in cyberspace: Online disinhibition effect, Online syndication, cyber footprint, cyber socialization, cyber exhibitionism, cyber migration Effect of cyberspace on physiology and personality: Sleep, stress, desensitization, depression, OCD, narcissism, ADHD, Self-esteem, FOMO, body dysmorphic disorder Student Activities: Self-evaluation of effects of cyberspace.	CLO2

UNIT III/12 Hours	Implication and consequences: Digital learning, online social networks, psychotechnology, online shopping, online games, cyber romance	CLO3
UNIT III/ 12 Hours	Implication and consequences: Digital learning, online social networks, psychotechnology, online shopping, online games, cyber romance Threats of cyberworld: Cyberbullying, Internet addiction, Cyber pornography, Cyber stalking, Trolling, social isolation, Cyber babies	CLO3
	Student Activities: Observe real life instances of people occupied with above cyberworld behaviours and discuss them in class	
UNIT IV/ 12 Hours	Morality in cyberspace: Parental mediation of digital usage, Values in cyberspace, ethics in cyberspace. Therapies/Models/Applications for cyberpsychology: Psychoanalysis, CBT, EMDR therapy, mindfulness based theraphy, e-Therapy, Online counselling, Psychoeduaction, ELIZA, Quenza,	CLO4 CLO5
	Student Activities: Spread awareness about the ethics of cyberspace to 2-3 friends.

Course Title: Neuropsychology Total Hours:

45

Course Learning Outcomes:

After the completion of this course, the students should be able to

- CLO1: Provide knowledge and understanding of brain, mind and behavior relationship with the help of current developments in the field of neuroscience, scientific theories, clinical and real-life examples.
- CLO2: Facilitate a dynamic understanding of the field by discussing neuroimaging techniques, case examples, and current research.
- CLO3: Examine the field of neuropsychology as a framework for understanding behaviour and mental processes

Units/H ours	Contents	Mapping with Course Learning Outcome
UNIT I/10 Hours	Brain, Mind and Behavior: Historical Perspectives; Emerging research areas in neuropsychology Student Activities: Draw a chart showing the emergence of neuropsychology	CLO1.
UNIT II/11 Hours	Methods of Investigating Brain: Electrical methods, Electrophysiologic procedures; Neuroimaging techniques Student Activities: Make a visit to a local laboratory to have a general awareness about the functioning of various machines used for investigating the brain.	CLO1 CLO2

UNIT III/12 Hours	Neuropsychological Assessment: Neuropsychological Assessment Batteries, Tests, Interviews, Observation; Neuropsychological Assessment of Everyday Activities; Process approach to Neuropsychological Assessment	CLO3
	Student Activities: Make neuropsychological assessment for a subject with some brain dysfunctioning.	
UNIT	Deficits, Recovery, Adaptation and Rehabilitation:	CLO1
IV/12 Hours	Neuropsychological deficits in stroke, head injury, tumors, epilepsy; Brain Reorganization and Plasticity; Spontaneous Recovery; Neuropsychological Rehabilitation	CLO3
	Student Activities: Spread awareness about neuropsychological rehabilitation in a local community for about 2-3 days.	

- 1) Lecture
- 2) Demonstration
- 3) Lecture cum demonstration
- 4) Group discussion
- 5) Focused group discussion
- 6) Cooperative learning
- 7) Brain storming
- 8) Collaborative learning
- 9) Problem solving
- 10) PROJECTOR METHOD (tool for transaction)

Course Title: Psychotherapies Total Hours: 45

Course Learning Outcomes:

After the completion of this course, the learner will be able to

- CLO1: Comprehend the issues related to Psychotherapies.
- CLO2: Apply psychoanalytic therapy in alleviating the effects of mental disorders.
- CLO3: Make use of different behavior therapies for treating different types of behavioral and mental disorders.
- CLO4: Utilize cognitive behavior therapy in modifying negative thought processes of people with depression.

Unit/Hour s	Contents	Mapping with Course Learning Outcome
Unit I/ 12 hours	Psychotherapy: Nature and Process of Psychotherapy; Goals of Psychotherapy; Therapeutic Relationship; Evolution of Psychotherapy; Contemporary Psychotherapy Models; Ethical Issues in Psychotherapy. Contemporary Issues in Psychotherapy Theory, Practice, and Research: A Framework for Comparative Study; The Evolution of Psychotherapy and of Essential Psychotherapies; Framework for Comparing the Psychotherapies. Student Activities: Trace the evolution of psychotherapy in India.	CLO1
Unit II/ 10 hours	Contemporary Freudian Psychoanalytic Psychotherapy; The Basic Structure of Psychoanalytic Psychotherapy; Relational Psychoanalytic Psychotherapy: The Basic Structure of Relational Psychoanalytic Psychotherapy. Student Activities: Discuss the criticism received by psychoanalytic psychotherapy in history. Discuss how this psychotherapy still holds an important place in today's world.	CLO1, CLO2

Unit III/ 12 hours	Behavior Therapy: Traditional Approaches-Assessment Strategies Used in Behavior Therapy; The Practice of Therapy: Psychoeducation, Exposure-Based Strategies: Exposure Modalities, Exposure Hierarchies; Response Prevention; Operant Strategies; Behavioral Activation; Social and Communication Skills Training; Modeling; Problem-Solving Training; Relaxation-Based Strategies; Mindfulness- and Acceptance-Based Strategies. Student activities: Discuss the real-life cases from history where psychotherapy had gone wrong.	CLO3
Unit IV/ 11 hours	Cognitive Behaviour Therapy (CBT): Assessment, Formulation, Therapeutic Stages, Termination and Relapse. Application of CBT: Anxiety Disorders, Depression, Eating disorders and Personality Disorders; Rational Emotive Behaviour Therapy (REBT): Eye movement Desensitization and Reprocessing Therapy, Assessment, Formulation, Therapeutic Stages, Termination and Relapse. Student activities: Make a hypothetical case and apply CBT to help alleviate the symptoms of the subject. Demonstrate the entire role-play to your teacher.	CLO4

Course Title: Human Resource Management Total Hours: 45

hours

Course Learning Outcomes:

After the completion of this course, the students would be able to:

- CLO1: To understand the human resource practices in organizations and build a foundation for assisting organizations in resolving human resource problems.
- CLO2: To apply the psychological aspects involved in various HR functions.
- CLO3: To comprehend the operative functions performed by Human Resource Managers / Leaders

Units/F	lours	Contents	Mapping with Course Learning Outcome
UNIT Hours	I /10	Human resource management: Definition; Function; Objectives; Challenges: Economic and technological change, Workforce availability and quality concerns, Demographics and diversity issues, Organizational restructuring; Models of HRM: The matching model of HRM, The Harvard framework. Ethical issues in HRM.	CLO1
		Student Activities: Draw a comparison between Indian HRM and Global HRM – What are the global HRM practices can be applied in Indian HRM practices by thinking globally but acting locally keeping in mind local Indian cultural issue / dynamics	

UNIT II/ 11 Hours	Strategic Human Resource Planning: Organizational Strategy and Human Resources; Organization Life-Cycle Stages and HR Strategy; Human Resource Planning; HR Planning Process—Developing the hr plan, Evaluating HR planning, Scanning the	CL02
	External Environment, Internal Assessment of Organizational Workforce; Forecasting: Forecasting the need for Human Resources (Demand), Forecasting Availability of Human Resources (Supply); Managing a Human Resource Surplus: Downsizing, causes of downsizing, consequences of downsizing, managing survivors of downsizing, Downsizing Approaches	
	Student Activities: Administer different psychological assessment tools on each other that are useful in recruitment of human resources. Simulation for behavioural interview. Case studies of different organizations using Employee Satisfaction Survey Tools and design/administer one of such tool to check students motivation, morale and engagement for their study	
Hours	Job Analysis: Nature of job analysis; Work analysis; Competency approach to job analysis; Competency analysis methodology; Organizational components and job analysis; Job descriptions and job specifications; Developing Job Families and Organization Charts; Job Analysis Methods: observation, work sampling, employee diary/log, interviewing, questionnaires, computerized Job Analysis, combination Methods Global Human Resource Management: Factors Affecting Global HR Management; International Staffing; International training and development	CLO3
	Student Activities: Case studies of different organizations using Performance Management Systems / Performance Appraisal Documents and prepare a recommendation to Improve the same by designing a model performance management process / performance appraisal document	

UNIT IV/ 12 Hours	Recruitment: Planning and Strategic Decisions About Recruiting; Decisions on Recruiting Sources/Methods; Internal Recruiting: Job Posting and Bidding, Promotion and Transfer, Current Employee Referrals, Recruiting Former Employees and Applicants, Internal Recruiting Database; External Recruiting: School and Recruiting, Labor Unions, Media Sources, Trade and Competitive Sources, Employment Agencies, Executive Search Firms, Internet Recruiting; Recruiting Evaluation
	Student Activities: Case studies of different organizations using above processes and prepare a recommendation to Improve one of the above processes

During Internship in any organization, Student will study one of the HRM practices mentioned in CL02 and CL03 in Industry and provide recommendation for improvement or share the learning experiences in his internship report.

Transactional Modes:

- 1. Lecture
- 2. Demonstration
- 3. Projector method
- 4. Group discussion

Course Title: Internship

Course Learning outcomes

- CLO1: Understand the functioning of mental health center/organization
- CLO2:Acquire applied knowledge of theoretical concepts learned in previous semesters
- CLO3: Learn and practice the process of psychological assessment and intervention
- CLO4: Explore the professional roles played by psychologists in the organizations

Units/Hours	Contents	Mapping with Course Learning Outcome
The internship will be of minimum four weeks. The students have to enroll themselves for internship after the second semester examinations.	As a part of this course, depending on the interest of the students, they are expected to complete 28 days of internship in any national or regional Hospital, Industry, Clinic, NGO, or a Counselling Setup with the consent of the head of the department.	CLO1, CLO2, CLO3, CLO4

Evaluation

The students would do the internship under the two supervisors:

Supervisor: A faculty member of the department to be nominated by the Head of the Department.

External Co-Supervisor: An in-charge (to be approved by the supervisor) of the organization where the students would undergo the internship.

The students need to submit a report along with the internship-completion certificate from the head/in-charge of the organization. They are also required to

make a presentation of the report, which would be evaluated by the supervisor, external co-supervisor, senior faculty member and the Head of the department.

Course Code: PSY.600
