

# **Central University of Punjab**

## **Course Scheme & Syllabus for Ph. D. Course Work in Statistics**

**Department of Mathematics and Statistics  
School of Basic Sciences**

**(Batch: 2025-26)**

### **Course work structure for Ph.D. in Statistics**

Students can move into the Ph.D. programme after successful completion of Ph. D. Course work during the first two semesters, provided they meet the requirements specified by the university.

### **Graduate Attributes:**

Learners will be able to develop a broad understanding of recent theories, tools and techniques in different research areas of Statistics. They will be well prepared and competent to apply various Statistical techniques in a variety of situations. They will be able to independently develop and plan research in various areas of statistics and allied areas. They will be well prepared to avail teaching and research job opportunities in the reputed institutes of India and abroad.

L	T	P	Credits
0	0	2	1

**Learning Outcome:**

At the end of this skill development course, the scholars shall be able to

**CLO 1:** familiarize themselves with the pedagogical practices of effective classroom delivery and knowledge evaluation system

**CLO 2:** manage large and small classes using appropriate pedagogical techniques for different types of content

**Activities and Evaluation:**

- The scholars shall attend Master degree classes of his/her supervisor to observe the various transaction modes that the supervisor follows in the classroom delivery or transaction process one period per week.
- The scholars shall be assigned one period per week under the direct supervision of his/her supervisor to teach the Master degree students adopting appropriate teaching strategy(s).
- The scholars shall be involved in the examination and evaluation system of the Master degree students such as preparation of questions, conduct of examination and preparation of results under the direction of the supervisor.
- At the end of the semester, the supervisor shall conduct an examination of teaching skills learned by the scholar as per the following **evaluation criteria**:
  - The scholars shall be given a topic relevant to the Master degree course of the current semester as his/her specialization to prepare lessons and deliver in the classroom before the master degree students for one hour (45 minutes teaching + 15 minutes interaction).
  - The scholars shall be evaluated for a total of 50 marks comprising *content knowledge* (10 marks), *explanation and demonstration skills* (10 marks), *communication skills* (10 marks), *teaching techniques employed* (10 marks), and classroom interactions (10).

### Learning outcomes:

The students will be able to

**CLO1** Review the basic notions in linear algebra that are often used in mathematics and other sciences

**CLO2** Define Vector spaces, Subspaces and related results.

**CLO3** Define linear transformations and characteristic polynomials with examples.

**CLO4** Illustrate various properties of canonical forms.

**CLO5** Study of Inner product spaces

**CLO6** Explain concepts of the Gram-Schmidt orthogonalization process.

<b>Unit I 15 Hours</b>	<p>Vector spaces, Subspaces: Definition and Examples, Linear dependence and independence, Basis and dimensions, Coordinates, Linear transformations, Algebra of linear transformations, Isomorphism, Matrix representation of a linear transformation</p> <p><b>Activity:</b> Students will construct different vector spaces like a set of all continuous functions, set of all polynomials. They will define Linear transformation on these spaces.</p>	CLO1
--------------------------------	---	------

<b>Unit II 15 Hours</b>	<p>Change of basis, Rank and nullity of a linear transformation. Linear functionals, Dual spaces, Transpose of a linear transformation. Annihilating Polynomials: Characteristic polynomial and minimal polynomial of a linear transformation, Characteristic values and Characteristic vectors of a linear transformation, Cayley Hamilton theorem.</p> <p><b>Activity:</b> Students will explore the geometrical and physical meaning of Characteristic values and characteristics vectors.</p>	CLO2
<b>Unit III 15 Hours</b>	<p>Diagonalizing matrices, Diagonalizing real symmetric matrices, Characteristic polynomials and minimal polynomials of block matrices, Canonical forms: Jordan canonical forms, rational canonical forms. Quotient spaces, Bilinear forms, Symmetric and skew- Symmetric bilinear forms, Sylvester's theorem, quadratic forms, Hermitian forms.</p> <p><b>Activity:</b> Students will solve the problems related to applications of canonical forms of matrices.</p>	CLO3
<b>Unit IV 15 Hours</b>	<p>Inner product spaces. Norms and distances, Orthonormal basis, Orthogonality, Schwarz inequality, The Gram-Schmidt orthogonalization process. Orthogonal and positive definite matrices.</p> <p><b>Activity:</b> Students will explore the application of defining norm and the inner product on vector spaces.</p>	CLO4 CLO5 CLO6

**TRANSACTION MODE:** Lecture/Demonstration/Project Method/ Co Operative learning/Seminar/Group discussion/Team teaching /Tutorial/Problem solving/E-team teaching/Self-learning.
